ISABELLE'S TRIP - By Jessica Larsen

Isabelle lived in Manaus – deep in the Amazon rainforest, and São Paulo was more than 2,000 miles (3,219 km) away. When her parents decided to move to São Paulo, they knew that they would have to make a long journey. So, the first means of transportation they took was a boat. The motor of the boat was so loud that Isabelle couldn't hear what her parents talk to each other. It was not easy for her, but Isabelle tried to focus on the reason for their journey – a good job opportunity for her father. And she also remembered hearing her parents talk about the beautiful house they were going to live in.

Do you believe that they slept in hammocks on the deck of the boat? They sang songs, and read stories. But then the drinking water had run out, and the river water was too dirty to drink. All of them prayed for a miracle. After the prayer ended, gray storm clouds were moving toward them. Soon rain began to pour down! She opened her mouth to catch the raindrops on her tongue. They grabbed some buckets and pans to catch all the water they could. It was really a miracle.

The boat reached land, but they still had 1,500 miles (2,414 km) to go. Everyone got on a bus for the rest of the trip. Almost seven days traveling to arrive in São Paulo, then finally they reached the biggest city in Brazil. Everyone was exhausted, but at the same time they were happy. This happened a long time ago, because nowadays, they are living in the USA.
